The 2005 Annual Conference of the ACCT held at Duke University North Carolina.

The conference was held in the main auditorium of the Searle Center Medical Sciences building and was attended by over 80 members of the ACCT.

A panel of 8 speakers presented over two days.
Dr Ron Blum. President of the ACCT welcomes attendees to the September 2005 annual conference.

Conference Chairman William Bradford from Cambridge in England and Conference organizer and coordinator Dr Rebecca Leando.

Dr Lewis Stocks. A pioneer in the field of thermal imaging, Dr Stocks presented cases of breast cancer patients, with thermograms, and discusses their findings and pathology. Dr Stocks was one of the first physicians in the state of North Carolina to recognize thermography's potential in paving the way for early detection of breast cancer.
Virginia Byers-Kraus MD.
PhD. Assoc. Prof. of Medicine,
Division of Rheumatology.
Duke University. Reviewed
recent published studies and
gave a preview of the
Osteoarthritis trials that are
currently being conducted at
Duke.

Dr Jay Mead was unable to present personally due to illness but his
lecture on current concepts regarding the pathogenesis of breast
cancer, including estrogen dominance, created great interest.
Sensitivity and Specificity of Breast Thermography Screening: A 3-Yr Follow-Up of Women Undergoing Screening with Thermal Imaging

James M. Blum PhD. Three-Year Epidemiological Study: Thermography v. Traditional Diagnostic Approaches for Breast Pathology An epidemiological Study to demonstrate the clinical significance of inconsistencies in thermal breast patterns, the sensitivity & specificity of breast thermography and the potential value of breast thermography in monitoring breast health.

Ronald I. Blum MD. - Clinical Research- Proving the Value of Breast Thermography. How Thermographers can contribute to a 3-Yr Follow-Up of Women Undergoing Screening with Thermal Imaging.
Hans Brostrom DVM, PhD. Prof of Surgery Large Animal Clinical Sciences Uppsala University Sweden.
Doctor Brostrom gave a very interesting presentation on equine thermography that impressed both ‘human’ practitioners as well as the veterinary attendees.

7. Kissing spines

9. Thermography

*Isogram
Diagnostic
Presented on the role of mammography in breast health. 29kvp radiation and RAD was the main topic and a literature review of recent studies produced much discussion.

Dr Bruce Shelton was represented in a video presentation which showed the results of breast treatments with homotoxicology monitored by thermography.
